Turquoise Moon Trading 21 (Pty) Ltd: Reg no: 2003/03024/07

02 May 2022

**RE: Reference for Project Undertaken by Mr OARABILE VUSIMPI JEREMIAH
MADHLOPE Student at Belgium ITVersity**

TO WHOM IT MAY CONCERN

The reference is to confirm that Mr OVJ Madhlope was requested by my company Turquoise Moon Trading 21 (Pty) Ltd a duly incorporated South African company in terms of the South African Company's Act, to conduct research in regards to the creation of an original software offering Traffic Law Enforcement Back Office Contravention System that will be rented to Local Authorities or municipalities in order to enable those municipalities to process, verify and collect traffic infringements by motorists.

Turquoise Moon Trading 21 (Pty) Ltd has been involved in this Public Private Partnerships with a number of local municipalities and the challenge has been that it rented a private Back Office Software of which the arrangements are not cost effective and further expensive.

Therefore, the company undertook to create its own Traffic Law Enforcement Back Office Software hence Mr Madhlope based on his studies at Belgium ITVersity we believe that granting him these opportunities the assignment / research project will expose him to technology that will enable him to create this product.

In a nutshell the Traffic Law Enforcement Back Office is an IT driven host capability that enables any user that operates the traffic speed cameras to electronically interface with the South African NaTIS system, which is the National register and asset that stores, records, manages and enforces the requirements of the National Road Traffic Regulations and subsequently issue traffic infringements to offenders or motorist who violated speed enforcements and ant traffic by-laws.
Mr OVJ Madhlope was also assigned with the project of creating a new and improved logo for Turquoise Moon Trading 21 (Pty) Ltd.

We believe the work he has done in research had exposed him to this field of work and he was only left with the last leg of consulting with an expert software designer to create this product.

We hope this reference will assist him in his future career endeavours.

Yours Faithfully,

Directors: Mandlakayise Kenneth Madhlope:
